

Wednesday 31st March 2021 - Another very successful online timed auction for Bletsoes. This sale was a farm dispersal sale at Thorney, Peterborough, due to a change in farming policy.

Top price on the day saw £11,400 for a 32 year old John Deere Combine, the sale gained interest from over the water with a purchaser from Northern Ireland buying the combine. Buyers and Bidders registered from Devon to Yorkshire, Suffolk to Derbyshire as well as next door. Prices of the pictured items a 26 year old Massey Ferguson Tractor £7,700 and a 37 year old Bonser Forklift at £2,050.

It may not seem a traditional way of auctioneering, but it works very well. With the current lockdown situation and some of the buyers saying they are uneasy mixing with large crowds of people even outside, it seems a very good solution to market all types of items. Selling this way also cuts down the cost of travel & time, with many buyers not taking up valuable time both travelling and attending on sale day. With collective sales, items do not have to be moved to a site many miles from your farm or business, they stay in situ until they have been paid for, making it a very safe way of selling and getting paid. We are holding an online timed auction Collective Sale at the end of April, if you have any items to sell.

Please find below some of the top prices gained at the Thorney sale.
